13

Challenges

- Low participation of private practitioners in animal health service. The NLPolicy recognises their role.
- The need for strengthening linkages for effective ethics monitoring and inspection at national, regional and global level.
- The need for collaborative auditing of training curricula for animal health services providers
- Low percentage of service providers participating in continuous education. E-learning
- Working environment in rural areas for extension staff/service

14

Recommendation

- Regulatory bodies discuss their affairs in meetings, there is a need therefore to establish or to have such provision at regional and global level.

The end

Thank you!
